Area: Cognitive Processing/Modeling

Dr. Chris Janssen on behalf of:

Coordinator: Dr. Martijn Mulder <u>m.j.mulder@uu.nl</u> <u>https://martijnmulder.wordpress.com/</u>

In spirit of Dartmouth workshop

"The study is to proceed on the basis of the conjecture that every aspect of learning or any other feature of intelligence can in principle be so precisely described that a machine can be made to simulate it."

Some topics:

- ✓ Language processing & -production
- ✓ Neural nets (cognitive modeling)
- ✓ Abstraction (from sensor data to concepts)
- ✓ Creativity

Value today

√ Human as <u>inspiration</u> for (system) design

√ <u>Benchmark</u> for performance

√ Human-Al <u>interaction</u>

✓ Al as tool to *understand* humans

Courses in area "Cognitive modeling"

 Experimentation in Psychology, Linguistics, and Al (INFOMEPL – term 3, slot C)

 Machine learning for human vision and language (INFOMLHVL – term 1, slot D)

Cognitive Modeling

(INFOMCM – term 2, slot A)

- Each course: mix of labs and lectures
 - E.g.: Modeling R-assignments on Processing, Machine Learning, and Probabilistic models

Even more options...

- With Agents & Information & Computer Science, e.g.:
 - Social Computing
 - Human-centered Machine learning
 - Agents courses
- With Reasoning:
 - Logics for Safe Al
 - Logic and Language
- With Linguistics:
 - Natural Language Processing
- With secondary electives:
 - Expose yourself to our breadth
